Most new cars are fitted with an automatic choke rather than a manual one. The choke automatically opens and closes the choke butterfly (or valve) in the carburettor depending on the temperature of the engine. It may be plumbed directly into the cooling system, or linked electrically to the engine temperature sensor.

Keihin carburetors are only legal in California for racing vehicles, which may never be driven on public highways or waterways. Keihin carburetors are designed to be used with normal pump gasoline. Fuels that contain over 10% alcohol content may damage parts in the carburetors. This may prevent the carburetor from functioning properly.
