Google Maps

latitude and longitude on the map or globe. Analyze and Conclude 1. Use a map to find the latitude and longitude of the following places. Mount St. Helens, Washington Niagara Falls, New York Mt. Everest, Nepal Great Barrier Reef, Australia 2. Use the map to find the name of the places with the following coordinates. 0°03'S, 90°30'W

Chapter 2: Mapping Our World - Lockport High School

A detailed topographic map can be used to provide useful information across a range of fields – from town planning and land management to data surveying and even simple route finding. The word “topography” refers to the graphic representation of surfaces – in the case of topographic maps, that means the geographical and man made features of an environment.

The Advantages of Using the Topographic Map

Index contour lines: Every fifth contour line is a thicker, “index” line.At some point along that line, its exact elevation is listed. Contour interval: The change in elevation from one contour line to the next is always the same within the same map.Many maps have either a 40- or 80-foot contour interval: An 80-foot interval simply means that each contour line is 80 vertical feet away from ...

MyTopo Free Online Topo Maps

TopoView highlights one of the USGS's most important and useful products, the topographic map. In 1879, the USGS began to map the Nation's topography. This mapping was done at different levels of detail, in order to support various land use and other purposes. As the years passed, the USGS produced new map versions of each area.

Get Maps | topoView

A topographic map series uses a common specification that includes the range of cartographic symbols employed, as well as a standard geodetic framework that defines the map projection, coordinate system, ellipsoid and geodetic datum. Official topographic maps also adopt a national grid referencing system.
