Abstract : Open surgery and endovascular therapy are two commonly accepted methods of treatment in patients with extensive aortoiliac occlusive disease (AIOD) with different advantages and disadvantages.The purpose of this study was to compare the rate of vascular graft patency in open surgery with endovascular stent repair in patients with iliac artery occlusion.

Comparative Study of Vascular Graft Patency in Open ...

Introduction: Subclavian artery injury is an uncommon vascular trauma with potential morbidity and mortality. Management of subclavian artery trauma requires open and endovascular techniques and timely and efficacious decision is mandatory. We retrospectively reviewed traumatic subclavian artery injuries in a high-volume vascular surgery center in Iran.
