With a broad portfolio that includes everything from phase, voltage and current monitoring relays to motor protection breakers, Eaton offers the protection your system needs against equipment failure and danger caused by voltage faults, current conditions or excessive load requirements.

Contactors and starters - Eaton

Gearmotors consist of a motor, gear, and bearings in a housing and are commonly used in applications that require a high amount of force (torque) at low speed. DC gearmotors require a battery power source and are used for precise variable-speed applications such as wheelchairs, hospital beds, lifts and medical tables, power seats, and other ...
